Stathletes is a Canadian company based in Toronto. It provides relevant data and statistics on athletic performance in order to solve the issues related to the subjective evaluations that plague professional franchises.

We work 10 hours per day monitoring sporting performances, visualizing 1.5 periods. Every period has 1000 events and every event happens every 2 seconds. I perform detailed analysis via a dedicated software to provide objective insight into player and team performance tendencies. This requires extreme focus, attention to details and accuracy.
